

ORANGEHRM

THE WORLD'S FIRST

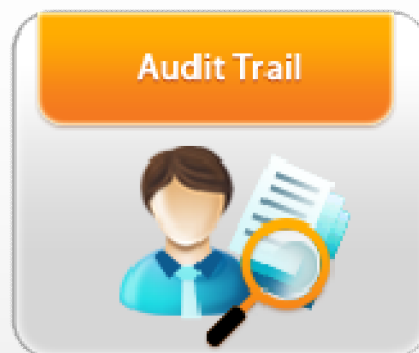

HR App Store

Track almost all information in the system at ease.

Ensures problem monitoring and intrusion detection, which caters to a stable, optimized HRM System.

Individual Accountability, thus allowing you to track individual actions performed within the system.

A reliable tool which could be used to track changes made to the records in the system by ESS users and Administrators in detail.

Reconstruct a series of events and track the impact on the system from a single action.

Filter your audit trail results by selecting standard search criteria.

Audit Trail

Set up the criteria that needs to be tracked when changes are made by employees & administrators.

Audit Trail

From To
